

Coding & Solution

Project: FitBuddy – AI Fitness Plan Generator Using Gemini

Purpose: Project-track submission material adapted to the supplied AI/ML/Gen-AI template.

Delivered implementation

Original FitBuddy application files are packaged under “FitBuddy Source Code”, including Python modules, HTML templates, JavaScript, documentation, and the project report that were present in the uploaded ZIP.

Main capabilities described by the project

Personalized seven-day workout generation, Gemini integration, persistence of user/plan information, feedback-based plan revision, nutrition tips, and an admin-facing user view.

Run/configuration note

Inspect the nested FitBudddy directory for the application entry point and project instructions. Use a local environment for secrets and verify dependency versions before running.
