

# Problem–Solution Fit

**Project:** FitBuddy – AI Fitness Plan Generator Using Gemini

**Purpose:** Project-track submission material adapted to the supplied AI/ML/Gen-AI template.

## User need

Users need a convenient starting point for planning a weekly workout around a stated goal and preferred intensity.

## Solution fit

FitBuddy combines a profile form, generative AI, plan persistence, and feedback-based revision in one web application.

## Assumptions to validate

- Users can provide enough context for useful suggestions.
- Generated plans are understandable and appropriately structured.
- Users understand AI output may be inaccurate and should be reviewed.
- The app's error handling is adequate when the AI provider is unavailable.

## Evaluation approach

Demonstrate complete user journeys, collect feedback from test users, and assess output clarity, response reliability, and input validation.
