

Project Executable Files and Setup

Project: FitBuddy – AI Fitness Plan Generator Using Gemini

Purpose: Project-track submission material adapted to the supplied AI/ML/Gen-AI template.

Included files

The original FitBuddy project source is included under “5. Project Development Phase/FitBuddy Source Code”.

Setup outline

1. Extract the archive. 2. Open the nested FitBuddy project folder. 3. Create and activate a Python virtual environment. 4. Install dependencies listed by the project. 5. Set the Gemini API key in a local environment configuration. 6. Configure the database. 7. Start the application using its documented entry point.

Important

The uploaded source archive may not contain a requirements.txt at the top level. Verify the actual dependency files and imports; do not assume dependencies are installed. Never commit API keys.
