

Project Planning

Project: FitBuddy – AI Fitness Plan Generator Using Gemini

Purpose: Project-track submission material adapted to the supplied AI/ML/Gen-AI template.

Phase 1 — Ideation

Define the problem, target users, project goals, and prioritized features.

Phase 2 — Requirements

Document user journeys, functional/non-functional requirements, technology choices, and data flows.

Phase 3 — Design

Prepare proposed solution, architecture, and interface/workflow design.

Phase 4 — Development

Set up Python environment, configure secrets/database, implement frontend/backend/AI integration, and document run steps.

Phase 5 — Testing

Test validation, successful AI generation, provider failure, persistence, plan revision, and UI behavior.

Phase 6 — Documentation and demo

Prepare setup instructions, screenshots/demo script, limitations, future improvements, and a reproducible demonstration.
