

Scalability and Future Plan

Project: FitBuddy – AI Fitness Plan Generator Using Gemini

Purpose: Project-track submission material adapted to the supplied AI/ML/Gen-AI template.

Near-term improvements

Add automated unit/integration tests, stricter response schemas, robust timeouts/retries, and clearer error messages.

Security and reliability

Add appropriate authentication/authorization for administrative functions, secret management, rate limiting, privacy-aware logging, and dependency scanning.

Scale options

For larger usage, consider a managed relational database, background jobs for long-running AI requests, caching where appropriate, and application monitoring.

Evaluation

Measure latency, successful completion rate, provider errors, output quality, and user feedback before making performance claims.
