

Technology Stack

Project: FitBuddy – AI Fitness Plan Generator Using Gemini

Purpose: Project-track submission material adapted to the supplied AI/ML/Gen-AI template.

Application technologies

Python backend; FastAPI; Jinja2 templates; HTML/CSS/JavaScript frontend; SQLAlchemy database access; SQLite or configured SQL database; Pydantic validation; Google Gemini SDK; python-dotenv.

Architecture notes

The included FitBuddy source files are the authoritative implementation. Some README descriptions may differ from actual filenames, so verify the imports and dependency list in the source before deployment.

Configuration

Set the required Gemini API key as an environment variable, install dependencies from the project's requirements file if present, and configure the database according to the application's settings.
